

AI Chatbot + Meta Ads for High-Speed Sales

Proposal by *Sajedar* — Your AI Business Partner

Overview

Sajedar helps businesses accelerate sales using a fusion of **Meta Ads** and AI chat automation. Our system captures leads directly from your Meta campaigns and engages them instantly through an intelligent, multilingual AI chatbot — powered by OpenAI's models (ChatGPT) and orchestrated using n8n automation workflows.

How It Works

1. **Lead Generation:** Meta Ads drive high-intent prospects directly to Messenger, WhatsApp, or your website chat.
2. **AI Chat Conversion:** An AI-powered chatbot greets, engages, and qualifies leads in natural conversation — converting chats into confirmed sales or appointments.

Chatbot Capabilities

- 24/7 Instant Responses on Facebook Messenger.
- Multilingual Support: Nepali, English, Romanized Nepali, Hinglish, mixed.
- Provides detailed product information and FAQs.
- Handles light bargaining or price justification (with admin-defined limits).
- Chats fluently in any language — native script, romanized, or mixed.
- Reads text from images and responds contextually.
- Notifies humans in complex or unclear situations.
- Supports human takeover: when a page admin replies, the bot stays silent until released.
- Can send QR payment images for semi-finalization (human verification required).

Key Benefits

- Instant Replies = Higher Conversions: Never lose a sale due to delayed replies.
- Reduced Workload: Offload repetitive queries and FAQs to the AI assistant.
- Focus on What Matters: Free your team to manage complex or high-value leads.
- Always Active: Operates 24/7, ensuring continuous engagement.

Pricing Options

1. Commission-Based Partnership (Preferred)

Sajedar handles everything: ad graphics, targeting, chatbot setup, automation, and optimization.

Commission rate determined based on product category, margins, and complexity. As performance scales, more chatbot capabilities are added incrementally.

2. Fixed Setup (Chatbot Only)

Starting at \$100 setup fee and \$0.01 per response.

Tier	Description	Setup Fee	Cost per Reply
Basic (Text-Only)	Ideal for FAQ or lead capture	\$50	\$0.01
Text + Image	Supports photos, OCR, and visual replies	\$80	\$0.015

Next Steps

1. Select your preferred pricing model.
2. Sajedar will onboard your business — integrating your Meta Page and chatbot.
3. Launch your first AI-powered sales campaign within 3–5 days.
